

Mettre une IP fixe sur Raspbian Stretch (Raspberry PI 3)

Modifier le fichier /etc/wpa_supplicant/wpa_supplicant.conf

```
nano /etc/wpa_supplicant/wpa_supplicant.conf
```

```
country=FR
ctrl_interface=DIR=/var/run/wpa_supplicant GROUP=netdev
update_config=1
network={
  ssid="nom accès wifi"
  psk="mot de passe accès wifi"
}
```

Modifier le fichier /etc/dhcpd.conf

```
#Interface ethernet
interface wlan0
static ip_address=192.168.11.13/24
static routers=192.168.11.1
static domain_name_servers=8.8.8.8

#Interface Wifi
interface eth0
static ip_address=192.168.1.220/24
static routers=192.168.1.1
static domain_name_servers=192.168.1.1
```
